

12th January 2018

Dear Parents/Carers,

Spring Term Update

Firstly, may I wish you all a Happy New Year and I hope you enjoyed a productive and restful Festive Season.

The governors, senior leaders and staff are all working hard to constantly improve the educational experience for the children and pupils in both schools so that they enjoy excellent teaching and wonderful learning opportunities.

To this end we are busy working on a range of exciting projects within the schools and working in partnership and collaboration with other schools and organisations to enhance the curriculum and to raise standards. We are also 'outward looking' in our approach to school improvement with staff and governors benefitting from teamwork and cooperation with a range of other Plymouth schools and national learning networks.

Action plans in both schools are primarily focussed on improving learning outcomes for all pupils in English and Maths. However, there are also a range of initiatives to promote positive learning behaviours, mental and physical wellbeing as well as creativity, enjoyment and equipping children with skills for lifelong independent learning.

The New Year promises to be an exciting time for all involved with the two schools as the federated governing body continues to be fully committed to improving the quality of education for all and to work in partnership with staff, parents and children.

Kindest regards,
David Bowles
Chair of Governors
